We need to verify that the computer and internet connection you plan to use on exam day meet the [minimum requirements](#) for online testing. It'll just take 5 minutes to run and you can do so after you've completed scheduling.

NOTE: We strongly recommend using a personal computer (not issued from your employer) and a wired, ethernet connection. The two most frequent causes of technical issues with online proctored exams are testing on (1) a work computer and (2) an unreliable internet connection. Firewalls or security settings from work computers may restrict the software from operating properly. Unreliable internet connections (wireless network, VPN, mobile hotspot) may lead to being disconnected.
